

Fan Motor Replacement

Old motor - 4 wire (white / yellow & blue / orange)

New motor - 2 wire (white & white)

Zip tie - to replace old zip tie.
Secures fan wire to lower distiller body
(keeps it way from the fan blades).

Female blade connection. One
replaces the 2 butted connections on
the fan switch (blue/orange), the other
replaces the butted up connection on
the relay (white/yellow). Motor rotates
clockwise regardless polarity.
