PWS Stream

Manual Water Distiller

with 8 Gallon/Day Boiling Tank &
Optional 3 Gallon Storage Tank Add-On

Featuring our newest line of home-use Precision Water Distillers! The PWS Stream is perfect for a small office or family. This manual water distiller is notably the best water distiller on the market today. Our High Quality is noted as follows:

- The **only distiller on the market** constructed with **high-grade stainless steel**, including the storage tank faucet.
- Utilizes a **high-grade Stainless Steel Refillable Charcoal Filter Canister**.
- **2-year warranty** on select parts & **15-year pro rated** on stainless steel.
- The **only water distiller manufacturer** certified in North America under **Canadian Standards Association's (CSA)** current stringent standards. Our units are **CSA/UL certified** under Class Number: **C2831-83 and C2831-53**.

PWS Stream SPECIFICATIONS*

Width 17 1/4" 43.8cm Weight 25 lbs 11kg

Volts	Amps	Hertz	Watts
120v	9.2	60	1100
220v**	5.0	50/60	1100

*Specifications include Sight Gauge and Lid.

**For international 220V Countries only.

The PWS Stream Water Distiller is a result of over 35 years of distillation manufacturing experience. Its features and benefits provide the very best water system for steam distilled drinking water. The PWS Stream provides safe pure water at home for a fraction of the cost of bottled water.

The PWS Stream Water Distiller duplicates nature's own method of purifying water. This highly reliable process for purifying water combines distillation with a high-capacity activated carbon filter providing clean, great tasting water.

Your PWS Stream is the most advanced water distiller on the market today. They are designed with many user-friendly features:

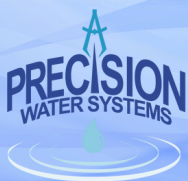

When manually filled, this distiller will distill approximately one gallon of pure water before automatically shutting off.

Designed with the largest lid opening in the industry and a "V" bottom boiler, your distiller is easier to maintain. The PWS Stream has high quality power and fan switches as well as a float switch that shuts the distiller off when the water level is low.

The raw, or tap water, is heated up and brought to a boil and the pure steam rises. The steam enters a baffle system that directs the steam towards the cooling coil. As the steam enters the cooling coil, a gas vent releases any volatile gases from the coil.

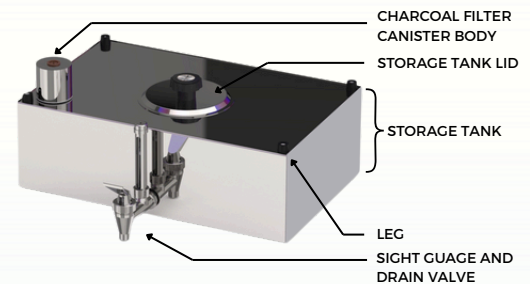

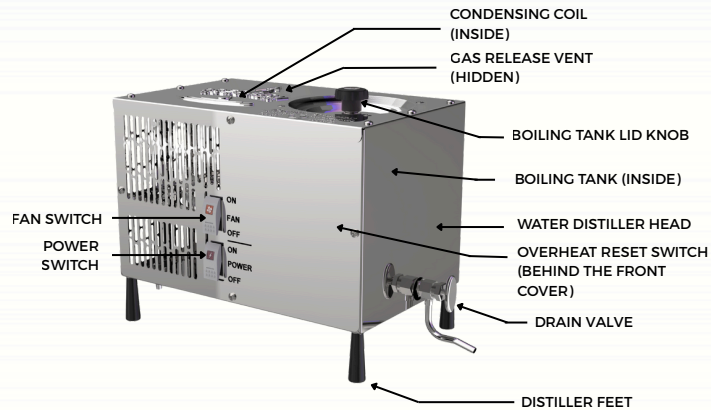

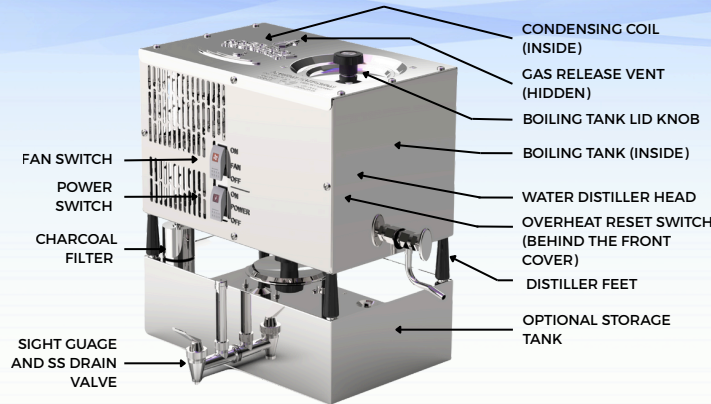

FEATURES AND BENEFITS

- 💧 Seal protected switching
- 💧 Highly efficient, stainless steel finned coil
- 💧 Large 5" boiling tank opening
- 💧 Stainless Pure Water Faucet (on optional holding tank)
- 💧 Warranty:
 - 2 years parts
 - 15-year pro rated on stainless steel
